State Teams Sharing/Discussion of Action Items

Tuesday, June 27, 2023

3:45 -4:45 PM

Team Share Outs (30 min.)

Purpose: To allow each State Team time to share with the other teams in their room, their top priority (or two) that they identified during their two hours of State Team Action Planning.

Process: Each team has 5 min. to share their top priority (or two) that they entered into their Action Planning template. During your share out please address these 3 questions:

1. Why did this emerge as your top priority for your state?
2. What are the first actions you'll take to begin to address this priority after the Summit?
3. Did you identify any help that you need from the InnovATEBIO Center related to this priority?

Discussion of Priorities & Action Items (30 min.)

Purpose: The goal of this discussion is to identify common priorities or challenges faced by multiple states.

- Each state will see they have natural partners in other states who will be working on the same priority.
- This will help the InnovATEBIO Center design ways to support State Teams who are working on similar priorities.

Process: Moderator facilitates a discussion among the states about opportunities for sharing of resources and best practices and collaboration. Moderator asks how the InnovATEBIO Center can support the state teams.
